

Sequence Diagram

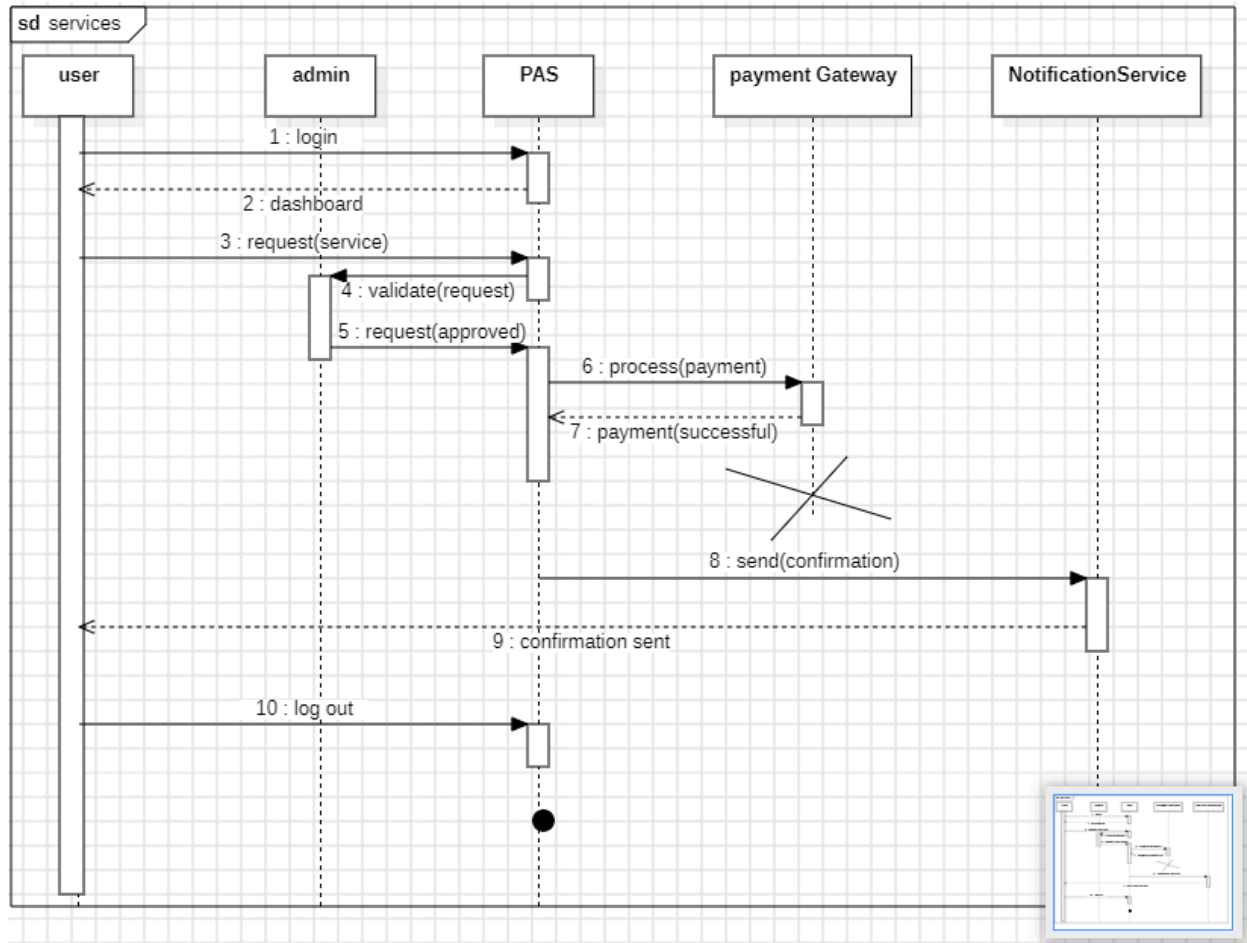

Scenario used:

1. The User logs into the System by providing valid credentials.
2. The System verifies the credentials and confirms successful authentication.
3. The User submits a service request to the System.
4. The System forwards the request to the Admin for validation.
5. The Admin approves the request and sends the approval to the System.
6. The System initiates a payment process with the PaymentGateway.
7. The PaymentGateway processes the payment and confirms success to the System.
8. The System sends a confirmation to the User using the NotificationService.
9. The User logs out of the System, completing the process.
